

Clearing the Values on Avaya Handsets

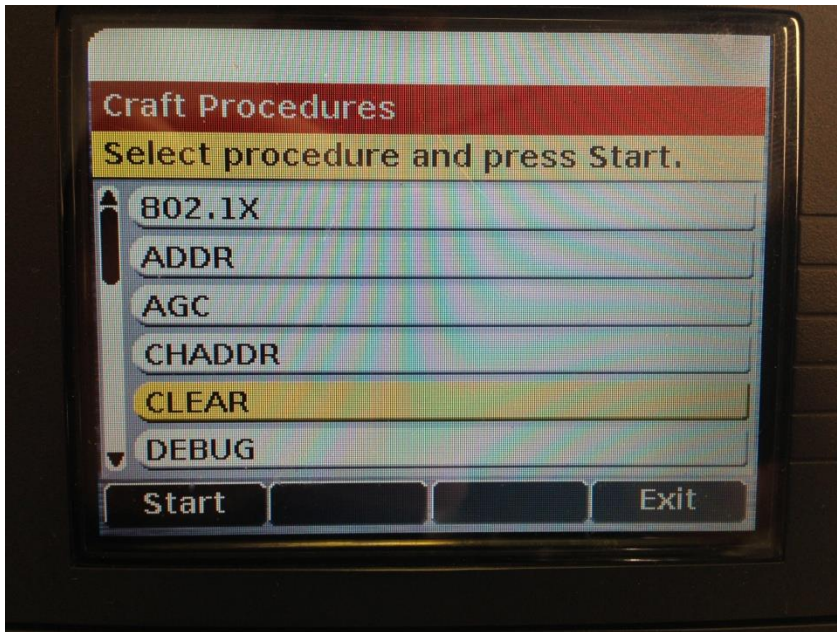

Plug the handset in and wait for the display to show “* to program”, then press “*” on the phone keypad

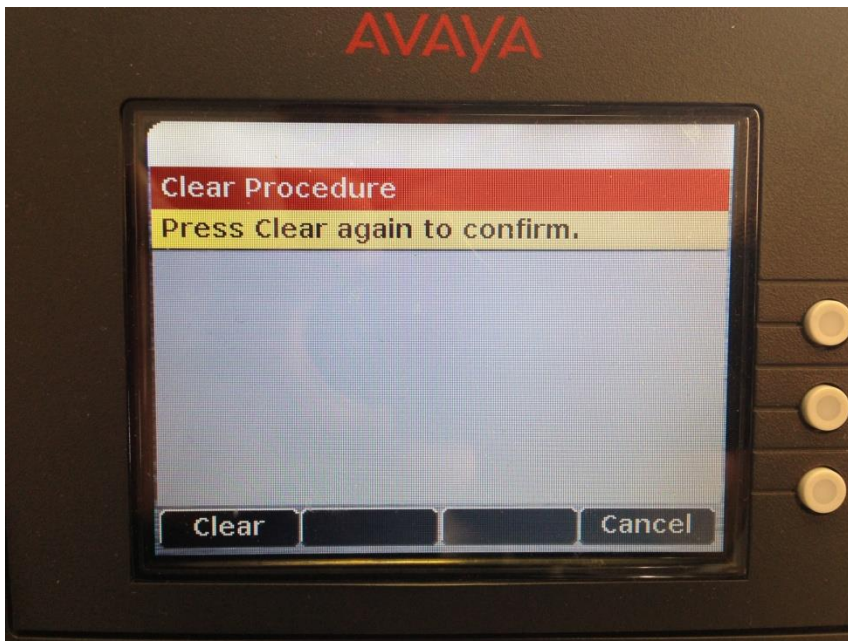

When the phone display shows “Enter code” press “27238” on the keypad:

In the “Craft Procedures” options scroll to the “CLEAR” option and press the “Start” button:

Then press the “Clear” button to confirm and start the reset of the handset:

The phone will then clear the values and restart:
